Maps

Map Type	Background	Information to include	Map Elements	Total
				\$35.00

* First map for a client is \$35, additional maps for the same client are \$10/each.	Total	
--	-------	--

Locator maps have a single view that covers all of the properties. Focus maps have closeups of an individual property. A focus map can have up to four frames showing a single property or neighborhood.

Maps background options include airphoto, topography, or simple roads/public land.

In the information to include column, specify what you want to emphasize on the map. Options include public lands & Suncadia, trails (summer trails, winter trails, specific sport), sport facilities (boat launches, trailheads, golf course, etc.), schools, grocery stores, urban boundaries, flood zones, museums. Maps can also show things of concern to the client such as flood zones, slope, or zoning.

Map elements include locator map, north arrow, legend, and scale bar. If you leave this blank, we will include what we think will work best on the map.
